<p>Sept 10 (Sat)</p>	<p>This day, I leave Japan and arrived at Thailand. Total flights time is about 7 hours, so long. In there we were picked up and Professor Tanu and Kai. After that, we went to shoppingmall. Because buy a prepaid mobile phone and necessities. Culture of Thailand excite me. For example cheaper price and spicy meal ,many bike and so on.</p>
<p>Sept 11 (Sun)</p>	<p>This day, we followed Kai in KU campus. And she explained each place in KU to us First impression is 'KU campus is very large'. Also surprised me is staying many homelessdog. I can't see sight like that. Next, we get uniforms. After, we went out KU campus and bought skirts for attending school. I bought two skirts.</p>
<p>Sept 12 (Mon)</p>	<p>This day, we had the first class about generality of epidemiology from 9:00a.m to 11a.m. Because Japanese students were said that is not good in that field, I braced myself for having class. But it was not easy. After that, from 11:00a.m to 12:00a.m and from 1:00p.m to 2:00p.m,we practiced case study about epidemiology by PC. We used statistics soft 'NSCC'. After class, we went to khamphaensean campus for greeting and welcome party.</p>
<p>Sept 13 (Tue)</p>	<p>This day, we had the second class that continuation of study yesterday. It's Descriptive Epidemiology. They were study and practice. We learned data management and data analysis. It's very important for control disease. Mainly, we learned T-test and Chi-squared analysis. It was One of weakest subject in japan, but today I learn and understand many things. We has it from 9:00a.m to 4:30p.m.</p>
<p>Sept 14 (Wed)</p>	<p>This day, we studied Epidemiology by Doctor Suporn. After study in classroom, we went out by field work in the temple. In there, we observed around environment. And came back university, we discussed and planned case study. I actually dose it was very important and complexly. We decided that will investigate relation between pigeon and visitor.</p>
<p>Sept 15 (Thu)</p>	<p>This day, we studied and planned for case study by Doctor Suwicha. We used PROMesa and Gpowerwin that was software at sight. They can estimate and calculate sample size and prevalence. It study was very difficult for me, but Doctor Nat explained clearly again and again. We used to plan for investigating next Wednesday. I think that have to practice using it.</p>

<p>Sept 16 (Fri)</p>	<p>This day, we went to airport. Today's professor was Dr. Phisanu. The object was learning about quarantine. In there, two veterinarians taught it to us. First, they presented about quarantine to me. Next, after lunch, we went to office of quarantine. In there, we were explained about documents and health check for important. I learned importance of Quarantine and role of veterinarian in the airport.</p>
<p>Sept 17 (Sat)</p>	<p>No training.</p>
<p>Sept 18 (Sun)</p>	<p>No training.</p>
<p>Sept 19 (Mon)</p>	<p>This day, we studied epidemiology about study designs and risk association by Dr. Sirichai. In study designs, it is important which cross-sectional study, Case-control study and cohort study. Difference among them is timeline flow of time. Next, I had examination about epidemiology learned until now. It was very difficult and I felt freshness about difference from Japan which method of making questions.</p>
<p>Sept 20 (Tue)</p>	<p>This day, we learned by Dr. Suwicha again. First, we studied scale of data. In method, there are T-test, ANOVA, correlation and regression. I feel so difficult. But, maybe they will be convenient for analysis of our investigation. After this study, we discussed to plan continuation of epidemiological investigation. Next, each team of investigation present method and hypothesis about it to teachers and other Japanese students.</p>
<p>Sept 21 (Wed)</p>	<p>This day, we went to the temple for epidemiological investigation. We collected data about pigeon and visitor feces in there from 8:30a.m to 4:00p.m. This activity is very hard and difficult because there were too many pigeons. But I completed to collect barely data. After, in our home, I will capture this data for analyzing tomorrow.</p>

Sept 22 (Thu)	This day, we prepared for presentation which we will have to do on this Friday. First, we typed and order sample data corrected yesterday. Unexpectedly, it was hard. Next we analyzed as epidemiological data and calculated useful value by using epidemiological software. And we made the documents for presentation by using powerpoint. I endeavor that make it simply.
Sept 23 (Fri)	This day, we had to present epidemiological investigation to teachers and another team. My team of presentation prepared for presentation in the morning. First, we made documents for presentation by using PC. Next, we thought contents about presentation. In this afternoon, we had presentation. But it was very difficult, because lack of preparation and using English. We received many advices.
Sept 24 (Sat)	No training.
Sept 25 (Sun)	No training.
Sept 26 (Mon)	This day, I had 1 st class of surgery. I was assigned rehabilitation section. I tensed because it was surgery and there were not Japanese there. Rehabilitation section is very interesting for me. Because it was not very seen in Japan. For example, treadmill in the water, laser treatment, electric treatment. I understood well that aftercare is important as well as operation.
Sept 27 (Tue)	This day, I had 2 nd class of surgery. I was assigned orthopedic section. I went in operation rooms at first, because I went in only rehabilitation room yesterday. So I tensed very much. I looked various cases, specially disease of hindlimb was many. These were very exciting, because I always had was interested in this area.

<p>Sept 28 (Wed)</p>	<p>This day, I entered emergency course of surgery. In the morning, there was few case. First patient had adenocarcinoma around anus. Next patient suffered from dystocia. Then one baby was left in her uterus. But the baby live. I looked that he was born. In afternoon, I looked many cases. Especially I work assistant of operation for the dog which have pyometra. I gave valuable experience for me.</p>
<p>Sept 29 (Thu)</p>	<p>This day, I was assigned anesthesia section. I think it is the busiest in all section. Receiving of patients are so much. I recorded condition of patients which were anesthetized in each operation. There were 2 cases today. At first, Thai student assisted me. But the second time, I recorded it by myself. I tensed very much. But I was glad, because I was prized by Thai student who taught me.</p>
<p>Sept 30 (Fri)</p>	<p>This day, I was assigned soft tissue section. Today is last day in Surgery term. First, two group had each presentation about case of disease. I couldn't understand Thai, but could understand part of presentation and document on the screen in English. After that, we observed many operations about soft tissue. And I worked as assistant of operation. I worked and moved well more than before.</p>
<p>Oct 1 (Sat)</p>	<p>No training.</p>
<p>Oct 2 (Sun)</p>	<p>No training.</p>
<p>Oct 3 (Mon)</p>	<p>This day, I had an internal medicine class at first. First, I had a meeting about it from 8:00a.m. to 8:30a.m. After that, we separated as some team. And I was assigned Urology section. Our team had cases some as medical examination. In this afternoon, our class was suddenly changed to pathology section. It was very difficult for me. So I think that have to study more.</p>

<p>Oct 4 (Tue)</p>	<p>This day, I had a class of pathology section. First, we gave explanation about the case. After that, we discussed for 30minutes and had presentation about it. The case had had hydronephrosis and renal calculi. The last lecture in this morning was anatomy of the cat. I did it at first. In this afternoon, we observed various sample by microscope and debated about it.</p>
<p>Oct 5 (Wed)</p>	<p>In this morning, I had a class about cytology in pathology section. Today's first teacher was Dr. tirapoon who taught us on this Monday. I learned features of various tumor and method of discerning tumors. In this afternoon, Dr. Phudit learned me pathology. Especially, we did case study. It case was distinguish anemia and function of liver and kidney. I think it is very difficult and important.</p>
<p>Oct 6 (Thu)</p>	<p>This day, I had a class about cytology and hematology in pathology section. First, we learned Dr. Phudit. He showed us around veterinarian facility inside the university. He instructed us in how do they blood test. In this afternoon, we were taught it by another teacher. We learned many cytological cases of disease and observed about it by microscope. It is good, because we could do not only learn but also look them of natural.</p>
<p>Oct 7 (Fri)</p>	<p>This day, I had last class about pathology section. We were taught by different teacher until now, but I forget his name. The class was done until this noon. I feel that it is very short time. First, we learned outline about cytology and hematology. After that, we did case study about case of marmoset. It is very difficult. But it is very important that we discuss and take out knowledge from myself.</p>
<p>Oct 8 (Sat)</p>	<p>No training.</p>
<p>Oct 9 (Sun)</p>	<p>No training.</p>

<p>Oct 10 (Mon)</p>	<p>This day, I had a microbiology class at first. We arrived 8:30a.m. and the class started 9:00a.m. I think that the class is study like other section. But, almost of this section is discussion for case study by only student. I was very surprised. First we and Thai student are separated two groups. And we debated about the case and investigated parts of assigned. So I was exciting.</p>
<p>Oct 11 (Tue)</p>	<p>This day, I had a microbiology class at first. I don't get accustomed to discussion style. So I still tensed. In this morning, we debated things about continue from yesterday. And we did examination of PCR. Because we wanted to know that PCV2 is positive in this case, or not. In this afternoon, we observed the result of it. And we debated it. I feel it is difficult, but it's interesting for me.</p>
<p>Oct 12 (Wed)</p>	<p>This day, I had a microbiology class. I received new topic. It was different from one of yesterday. That topic is about disease and symptom of feline. I felt that this topic is more difficult than one of yesterday. In this morning, we picked up problem and thought mechanism. After that, on lunch time, I searched about liver disease and tumor in library. After lunch time, we debated about each information by research.</p>
<p>Oct 13 (Thu)</p>	<p>This day, I had a microbiology class. First, we presented the things to teammate. It is homework which we search about new information of this case. And we debated it. This afternoon, I did RT-PCR. Because we wanted to know that FIPV is positive in this case, or not. After that we made documents and prepared for presentation of tomorrow.</p>
<p>Oct 14 (Fri)</p>	<p>This day, I had last microbiology class. We would have to do presentation about case 1 and 2 in this afternoon. So we used almost of time for preparing and making documents of presentation. And in this morning, we did RT-PCR of continue from yesterday. After that, we observed result of it. In this afternoon, we did presentation. I tensed very much. But somehow I managed to carry it off.</p>
<p>Oct 15 (Sat)</p>	<p>No training.</p>

<p>Oct 16 (Sun)</p>	<p>No training.</p>
<p>Oct 17 (Mon)</p>	<p>This day, I had the internal medicine class. First, I was assigned Ophtalmology section. I could see the many case. When I studied in Japan, I could not see these case. So it was very important and precious experience. In the afternoon I was assigned OPD section. There was 2case, and both is just health care.</p>
<p>Oct 18 (Tue)</p>	<p>This day, I had an Exotic animal medicine class in all day. It was looking forward to study it. I surprised that there were many doctors. And various animal came. For example rabbit, turtle, parrot, sugar glider and swan. Especially I was interested in swan and sugar glider medicine. I feel that case of Pneumonia or Fraction was many.</p>
<p>Oct 19 (Wed)</p>	<p>This day, I had a Gastroenterology medicine class in all day. 3 cases came our room. They were Beagle, Shi-zu, Siberian husky. Mainly they had liver disease. For example tumor, hemagio sarcoma. I felt it was so difficult. Especially I was interested in Siberian husky's case. The mass could not be removed, because it is too big.</p>
<p>Oct 20 (Thu)</p>	<p>This day, I had a OPD medicine class in all day. In this morning, 5 cases came there. They had vomit, mandibular fracture, canine distemper virus, colesistitis, urinaly paralisys. In this afternoon, 10 cases came there. I felt that it was interested in discospondylitis. The case had E.canis.</p>
<p>Oct 21 (Fri)</p>	<p>This day, I had an Ophtalmology section class in all day. We had class only in afternoon. I felt that in Ophtalmology, the medical words in English is so difficult for me. I saw 6 cases. Catract case was so many in coming cases. In every case, we did Schirmer test and Fluorescein dye. And I felt that I was very interested in sift of crystallin lens.</p>
<p>Oct 22 (Sat)</p>	<p>This days, we moved from Bang Khen to Khampheng Sean. We went to float market on my way to move. We had a lunch there. After that we went supermarket for buying household goods. Next we arrived at Khampheng Sean campus. We went around building.</p>

<p>Oct 30 (Sun)</p>	<p>No training.</p>
<p>Oct 31 (Mon)</p>	<p>This day, first I took care of Kiesel. Condition of both fore limb of Kiesel is better than before. So I was very happy. Result of physical examination is good too. I gave him medicine by PO. It was success. After that we saw some cases. In this afternoon, doctor gave me some question and home work. Finally, we have self-study. It was for presentation. So, my group made some slide and read many paper.</p>
<p>Nov 1 (Tue)</p>	<p>This day, first I had lecture about equine lameness. We went to farm inside of KPS campus. In there, we learn methods of examination of lameness. Mainly we learn method of trot and flexion test. It is very important for finding lameness. After that, in this afternoon, we learned about bandage. "Hard" is important in that.</p>
<p>Nov 2 (Wed)</p>	<p>This day, first I took care of Kiesel. Then we find problem of Kiesel. He had pain on left hind limb. Both fore limb is better than before, but new problem occurred on his left hind limb. In this afternoon, we saw some case. Those were problem of spines and reproductive check. After that, I had some tests. For example, they were horse handling and nose twist.</p>
<p>Nov 3 (Thu)</p>	<p>This day, first I took care of Kiesel. Second, we had self-study for presentation and oral examination. In the afternoon, some students had lecture of Neurology. After that we had self-study again. Horses which are assigned each group have different case. So, we explained about each case. And we made many slide and presented our doctor. We continued it midnight (around 12:00). After go back home, I study about other case for oral examination.</p>
<p>Nov 4 (Fri)</p>	<p>This day, we had to do presentation. It was very important in this unit. The presentation started at 9:00a.m. All of teachers of equine unit attended in this. I was not presentator. But I was very nervous. It was success. In this afternoon, I have oral examination. It was that 4 persons is one group and have 40minits. Those were discussion type. After that I took care of Kiesel at last.</p>

<p>Nov 5 (Sat)</p>	<p>No training.</p>
<p>Nov 6 (Sun)</p>	<p>No training.</p>
<p>Nov 7 (Mon)</p>	<p>This day, first we left KPS campus for nongpho hospital. After arriving, we had case of atresia. The operation which is corrective surgery started soon. I was interested in this operation. Because if we find this case, we won't do this operation well.</p>
<p>Nov 8 (Tue)</p>	<p>This day, first we went to see the calf with pneumonia. She was still alive, and better than before. Second, we listened presentation of epidemiology. It was difficult for me. After that my group(3people) went to house call. We visited 2 farms. First farm had 2 cases of mastitis. Next farm had pneumonia and 2cases of mastitis. After coming back hospital, I took care of the calf of pneumonia.</p>
<p>Nov 9 (Wed)</p>	<p>This day, first we took care of the calf of pneumonia. He had been better than before yesterday. But this day, he was so weak. After 1 hours, he dead. It is so suddenly and so sad for me. After that our team went to house call. We looked 3 cases in 2 farms. In first farm, we looked disease of foot. In second farm, we looked FMD for the first time. It was precious experience.</p>
<p>Nov 10 (Thu)</p>	<p>This day was final day of house call. First I looked kid. Her mother Abandoned child care. And her right eye was swollen. After that our group went to house call at 2 farm. They are so far from Nongpho hospital. First, we looked reproductive disease. And she had lameness too. In second farm, we looked case of suspected FMD. But she don't has FMD.</p>
<p>Nov 11 (Fri)</p>	<p>This day, first we submitted paper of OPD to our doctor. After that we had self-study for presentation. I was one of presenter. So, I had to make script and complete slide in the afternoon. After lunch, we did presentation. This presentation was success. After that doctor gave us some question. They are so difficult, but so important. After presentation, we went back to KPS</p>

Dec 1 (Thu)	This day, in this morning, at first I went to hospital at 8:00 before practice. Because I had to discuss of our presentation with our team. After that, I had practice in the hospital. And I saw after care of case of bladder rupture. Next, case of uterine prolapse was carried at the hospital. Hers symptom was very severe. After operation, she was dead. After practice, we did presentation of our case with doctors.
Dec 2 (Fri)	This day, in this morning, I take oral examination of bovine. It was from 9:00am to 11:00a.m. It is very difficult for me. After that I prepared of presentation. From 1:00p.m, our group did presentation of bovine unit. After that, from 5:00p.m. All Japanese students did presentations of Aims program. After finish, Thai teachers did Award ceremony of Aims program for us. In this evening, Thai stuff opened farewell party for us. That time is my precious.
Dec 3 (Sat)	No training.
Dec 4 (Sun)	Today is final day in Thailand. Departure from our dorm is 4:30p.m. Many Thai friends come to our dorm and saw us off. And some Thai friends followed us to airport for seeing us off. But our bus had very heavy traffic jam. So, after arrived airport, we have a little bit time. But was my precious time. After talked with Thai friends. We left from Thailand to Japan.
