|-------------------------|--|
| <p>Jul 31 (Mon)</p> | <p>Shrimp Morning: Going to shrimp farm and measure pH, concentration of O₂, NO₂, NH₃, Mg²⁺ and Ca²⁺. In Japan, there are no shrimp farm so it is very interesting.</p> <p>Afternoon: Lecture about diseases about Shrimps. Shrimps is one of major industries in aquatic animals in Thailand. Actually Shrimp Diseases are not so important in Japan, so I feel the difference in industry between Thai and Japan.</p> |
| <p>Aug 1 (Tue)</p> | <p>Aquatic culture Morning: Lecture about Aquatic Ecology and how to breed and treat Aquatic animals. Fishes are affected by water contents like Ammonia Nitrogen, Oxygen and so on.</p> <p>Afternoon: Going to Guppy Farm. There we tried to diagnose Guppy's disease. Prediction what is the major factor is very difficult. But I think it is very interesting.</p> |
| <p>Aug 2 (Wed)</p> | <p>Aquatic culture Morning Lecture about anesthesia to aquatic animals.</p> <p>Afternoon: Class about anesthesia with Thai students. This is the first class that treat Fish and the way maintain anesthesia is so interesting.</p> |
| <p>Aug 3 (Thu)</p> | <p>Swine Morning: Lecture about Swine Management.</p> <p>Evening: Lecture about Swine disease. PRRS and PED are also famous in Japan, But we don't understand what clinical sign it cause. I think it is so regrettable and I wanna study hard.</p> |
| <p>Aug 4 (Fri)</p> | <p>Swine Going to Swine Farm</p> <p>We saw Sow unit and Lactation Unit. There we can see a lot of piglets. I am surprised at room temperature, for it is cooler than I imaged.</p> <p>I help giving a birth, it is so precious experience I will never forget.</p> |

|-------------------------|--|
| <p>Aug 7 (Mon)</p> | <p>Swine Morning: Lecture about Necropsy. And we did Necropsy the piglet that showed panting and seizure.</p> <p>Afternoon: we did Necropsy the piglet that showed seizure. I opened abdomen and thorax and took lung sample. It is so difficult and worth doing.</p> |
| <p>Aug 8 (Tue)</p> | <p>Avian morning: Lecture about evaluation of chick quality and</p> <p>Afternoon: we went to local farm. We can see broiler there, I am shocked that the density of chicken. I thought it is too crowded, but it keeps the Guide Line. Probably I can't go such a local farm....</p> |
| <p>Aug 9 (Wed)</p> | <p>Avian morning: Class about DOC analysis. We did observe Chick sold in market, we can find some lesions. The Raito chick has some lesion is higher than I imaged so I was surprised.</p> <p>Afternoon: prepare for presentation. I think preparing time is shorter as I imaged. But try to do my best.</p> |
| <p>Aug 10 (Thu)</p> | <p>Avian morning: Necropsy and evaluating GI tract and infection score about Eimeria. Teacher talk that our head is empty. I am frustrated, but I think It is correct.</p> <p>Afternoon: I wish we had additional day to prepare presentation.</p> |
| <p>Aug 11 (Fri)</p> | <p>Events: planting redder rice. It is kind of festival. I hadn't done planting rice, it is enjoyable. This event was kind of refresh.</p> <p>Discussing: Actually I was so nervous, but lecturer were so kind that I became relax and did my best. I think preparation was enough.</p> |

|-------------------------|--|
| <p>Aug 14 (Mon)</p> | |
| <p>Aug 15 (Tue)</p> | <p>Monkey: morning planting a young plant. These plants will grow up and monkey will eat flower or seeds. Evening: observing rural monkeys. When arriving there are many monkeys, but they cared about us and hid into the mountain. Only waiting for monkeys are so boring, but we saw squirrels and they were so cute!</p> |
| <p>Aug 16 (Wed)</p> | <p>Monkey: Moring Discussing about rural monkeys. First teacher talked about mountain circumstance. It is so fun thinking and imaging how to manage ecosystem and regional economy. I often heard communication with people is one of important job in veterinarian. I feel keenly the importance. Evening: visiting Monkey Town. Other guys probably refer to this topic.</p> |
| <p>Aug 17 (Thu)</p> | <p>Elephant: morning Talking about anesthesia to wild life animals. We practice blowgun shooting. It is difficult but we enjoyed. Evening Lecture about Elephant surroundings and disease. Teacher talked about the difficulty to treat Exotic animals and it is interesting to me.</p> |
| <p>Aug 18 (Fri)</p> | <p>Elephant Fieldwork: we went to Kanchanaburi Prefecture. First, we saw kind of cattle. These cattle are preserving, for it is important for tiger feed. Then we went Wildlife Sanctuary. I hopefully saw the shadow of Elephant, I want to see more clearly. But it is so precious that I am glad of belonging to Veterinary Department...</p> |

|-------------------------|---|
| <p>Aug 21 (Mon)</p> | <p>Cattle: Morning: we move to Nong Pho. And we had a farm visit. Before farm visiting, we talked herd management I didn't know daily cattle often have a problem on hoof, but actually some cattle has abnormal in hoof. This is the first time doing rectum palpation, so I was nervous.</p> |
| <p>Aug 22 (Tue)</p> | <p>Cattle: Morning: we went to daily farm to check pregnancy and detect BCS. I refer to paper to check BCS, but it is difficult to evaluate. Afternoon: we did some rectum palpation, it is too difficult to touch horn of uterus and ovary. During Nong pho staying, I want to detect ovary easily.</p> |
| <p>Aug 23 (Wed)</p> | <p>Cattle: Morning: went to daily farm. Dr.Poo told that objective to go to farm is mostly monthly check. I know it is also important, but it is not so interesting for veterinarian. I want to see sick cattle. Evening: went to daily farm. Owner told it was mastitis. In addition to mastitis, there are respiratory problem. I did auscultation but detection of abnormal sound is so difficult.</p> |
| <p>Aug 24 (Thu)</p> | <p>Cattle: Morning: firstly, we went to the farm that we had been to on yesterday. The sick cattle looked going well. I'm so relieved after I did physical exam. Then we moved to another farm and performed a rectal palpation. I finally touched ovary. I did over one rectal palpation per a day. It is good experiment for me,</p> |
| <p>Aug 25 (Fri)</p> | <p>Cattle: Morning: preparing for presentation. It is hard for me to make flowchart about hypocalcemia, so It took one hour to make only one slide. I wish I can make faster. Afternoon: presentation about retained placenta. Owner had told that it is retained placenta, but Professor advised us to doubt owner notification.</p> |
| <p>Aug 26 (Sat)</p> | |
| <p>Aug 27 (Sun)</p> | |

| | |
|-----------------|--|
| Aug 28 (Mon) | Cattle: Morning: Dr. Adyson and Dr. therra gave lecture about daily cattle management. |
| Aug 29 (Tue) | Cattle: Morning: Practice about rectal palpation. Lecturer taught us how to touch and evaluate reproductive organ. But it is too difficult to detect organ. Afternoon: looking around demonstration farm. |
| Aug 30 (Wed) | Cattle: Assessment about mastitis. Dr. Tan are so kind but I am not so interested in assessment. I wish I could practice rectal palpation. |
| Aug 31 (Thu) | Cattle: Assessment about mastitis. We prepare for presentation but data analysis is difficult. It is not so fun for me. |
| Sept 1 (Fri) | We did presentation. We finally managed to do, I felt relieved. This week was not attractive for me. I wish I enjoy practice on next week |

|--------------------------|---|
| <p>Sept 4 (Mon)</p> | <p>Bovine: Morning: Farm visit. First I heard farm visit, I thought we do rectal palpation. but I did vaccination of Foot Mouse Disease. In Japan, Vaccination of FMD isn't carried out, so it is precious opportunity for me. Afternoon: I saw Lameness. Tomorrow, we will try standing up.</p> |
| <p>Sept 5 (Tue)</p> | <p>Bovine: Morning: I visit yesterday farm where the cattle still Lameness and cannot stand up. We tried to stand up by using hip cramp. But Finally cattle was not willing to stand up. I heard the cattle turned to cull Evening: I saw Hardware disease. First I thought hardware disease mean pericarditis. But it occurred occasionally.</p> |
| <p>Sept 6 (Wed)</p> | <p>Bovine: Morning: I saw ship fever case. Ship fever is followed by cattle transportation. She catch pneumonia as a complication of a ship fever. Afternoon: Case discussion with Dr.Somchai and Dr.Art. I should have made my topic more interesting with deeper learning.</p> |
| <p>Sept 7 (Thu)</p> | <p>Bovine: Morning: I saw Lameness cattle, she could not stand from Sep 6. We tried to stand her up with hip cramp as Sep 5. Finally she can stand up. I was deeply impressed because last time I saw a case which failed to stand up and went to Slaughter house Afternoon: I saw hoof trimming.</p> |
| <p>Sept 8 (Fri)</p> | <p>Bovine: Morning : Presentation about case of Hardware disease that I saw Sep 5. This case had 3 clinical signs. It seems no relationship, but there had relationship in the point of physiology. There are some questions about this case, but I manage to answer. So I felt keenly. Afternoon: Oral Exam and Visit Elephant hospital.</p> |
| <p>Sept 9 (Sat)</p> | |
| <p>Sept 10 (Sun)</p> | |
