July 12 (Tue)	
July 13 (Wed)	<p>Morning: Cardiology Many dogs with problem in mitral valve. Learned how to identify systolic murmur (palpable in femoral artery) from diastolic murmur (impalpable) If the protocol does no harm to the animal, important to keep on going. Have to practice NOW not later. Afternoon: Neurology Watching hemi laminectomy (L4~6) in a retriever</p>
July 14 (Thu)	<p>Morning: Cardiology Congenital Patent ductus arteriosus, could not do surgery so treated by medical care. Did inquiry and general physical examinations in 2 mitral valve patient(Revisit) Many dogs with problem in nutrition Afternoon: Neurology Dogs with epilepsy, DJD, GME, MG</p>
July 15 (Fri)	<p>Morning: feline practice Many cats with FeLV, FIV which is not common in Japan. Only can treat for pain, is important to inform the owner. Learned how to exam cat's general physical condition, dehydration. Had homework to list up the cause of Polyuria and Polydipsia, how to control chronic kidney disease and why hyperphosphatemia happens.</p>
July 16 (Sat)	
July 17 (Sun)

July 18 (Mon)	
July 19 (Tue) Asalha Bucha	
July 20 (Wed)	
July 21 (Thu)	<p>Morning: Gastroenterology, Dog with emphysema liver (air in Gall Bladder or hepatic duct) maybe caused by gas-producing bacteria. Dog had antibiotic, but no improvement. Cholecystectomy was needed because of the abdominal pain, activation of dog decrease.</p> <p>Afternoon: OPD, 1. Dog with nasal discharge, coughing, sneezing. Prescript antibiotics and steroid. 2. Dog with left half paralysis. Cause maybe traumatic or parasitic. Prescript anti-parasite and anti-inflammation.</p>
July 22 (Fri)	<p>Ophthalmology, did general examination from Schirmer Tear Test, menace test, palpebral test, dazzle test, slit lamp test, fundus examination, Fluorescein staining. Dog with Keratoconjunctivitis sicca, cataract, glaucoma was common. Dog with phthisis bulbi , iris atrophy were rare case.</p>

<p>July 23 (Sat)</p>	
<p>July 24 (Sun)</p>	
<p>July 25 (Mon)</p>	<p>Morning: Radiology Since the teachers had an assembly, we could not do practice on schedule, which had a little problem in dividing the group in two. The teacher told us in detail even they had many patients in the morning and had very little time. Afternoon: Urology Learned more about chronic kidney diseases.</p>
<p>July 26 (Tue)</p>	<p>Morning: Exotics Had no case for one hour Afternoon: Radiology, Urology Had no case in Radiology, so went to Urology</p>
<p>July 27 (Wed)</p>	<p>Morning: Endoscopy and Rehabilitation No case in Endo, so watched Lateral Suture operation and conjunctival flap operation. Very interesting because you cannot have a chance to see conjunctival flap using amnion. In rehab, we saw many machines for rehabilitation of the function of body. Afternoon: Radiation Two group joined together, but still no case but Thai students took grate care of us and asked the teacher to show some of the rare cases. In this three days we had difficulty in finding what to do, but the Thai students and teachers always had the enthusiasm to teach and help us study</p>

July 28 (Thu)	OPD Dr. Gunn explained us many not only about the cases but also about attitudes how we should think and work as an internal medical vet. Since the environment in Thai is quite different compared to Japan, the way doctors deals with the patients were different.
July 29 (Fri)	OPD Two revisit cases. Was good to see the outcome of the treatment you did the other day. Found out that my handwriting was horrible on the paper.
July 30 (Sat)	
July 31 (Sun)	
Aug 1 (Mon)	Urology We saw the hemodialysis equipment. It could be better if we had a case using the machine. I had a chance to re-check the case I saw before and it wasn't getting well as I expected. I learned how hard to maintain Chronic Kidney diseases. We had only few case in the afternoon so we were taught about hypoglycemia.
Aug 2 (Tue)	Radiation We've already been in the Radiology unit, so we were used to the schedule. Doctor taught us how to do ultrasound which was the best experience in the unit

<p>Aug 3 (Wed)</p>	<p>Neurology We changed units with different team because they hadn't been to the cardiology unit we should go this morning. I hope this wouldn't happen again. First we were planning to go to Endoscopy, but they had case in the afternoon so Dr Nirut told us to join his unit. He told many about spinal cord.</p>
<p>Aug 4 (Thu)</p>	<p>Morning: Gastroenterology Changed units because of same reason. The doctor had man cases and could not understand the history of the patient, but she explained everything after she finished with the patients. Afternoon: Feline Medicine Worked with Kik sensei, our senior of toudai surgery lab.</p>
<p>Aug 5 (Fri)</p>	<p>Morning: Feline medicine Dr Panpicha had a case which summarizes all of our study we had done during the internal medicine practice I had great time working with Dr Panpicha and Dr Kik and want to thank them a lot, and of cores all of the teachers, students, assistants whom helped me during practice. I had a wonderful experience I probably could not have in Japan. Thank you for all the efforts and kindness they gave to me and would like to pay it forward.</p>
<p>Aug 6 (Sat)</p>	
<p>Aug 7 (Sun)</p>	
<p>Aug 8 (Mon)</p>	<p>Orthopedics First day for surgery, we were made to wait for about an hour to start the orientation, which was too long to wait early in the morning. Thai students were very kind to us. The report form was not ready</p>

<p>Aug 9 (Tue)</p>	<p>Second day for Orthopedics Felt sorry for the thai student to ask her translate everything in English. Also had difficulty in my technical terms as usual. Dr Wijit took us to badminton again, had very good time</p>
<p>Aug 10 (Wed)</p>	<p>Third day of Orthopedic Presentation and question in the morning and Round table discussion was in Thai and gave up asking Thai students to translate it all.</p>
<p>Aug 11 (Thu)</p>	<p>Fourth day of Orthopedic Could see the TPLO which was a good experience for me Teacher and students helped me a lot to understand the procedure Had intern presentation in afternoon. Wish I brought my glasses because I was far from screen and all in Thai again Move to Hua Hin in the evening</p>
<p>Aug 12 (Fri) The Queen's Birthday</p>	<p>OPD in Hua Hin Very nice place. Few case because of the bombing. Dr Consac greeted us, and took grate care for us. We thank him and his staff for their hospitality.</p>
<p>Aug 13 (Sat)</p>	<p>OPD in Hua Hin Still few case. One surgery case canceled probably from the bombing. Worked in the CCU, mainly changing the dressing of chronic wounds. Felt sterilizing was an important task for good prognosis</p>
<p>Aug 14 (Sun)</p>	<p>Looked around the hospital Dr Pong showed us around in the hospital because no case was coming for surgery, unfortunately. I am upset I couldn't observe Dr Pon's surgery. Had conversation with Dr Pong about reconstruction of the urinal tract. It was hard to explain and I could not tell the whole thing correctly so I'd like to improve my skill before I see Dr Pong again Dr Consac took us all the way to our dorm, could not thank him enough for his kindness Regardless of the bombing, I had a great time in HuaHin, and would like to come back again sometime.</p>

Aug 15 (Mon)	Anesthesia Had difficulty for SOAP form because of lack of knowledge. ER cases was difficult to write soap because they had no data before case coming.
Aug 16 (Tue)	Anesthesia We had to prepare for presentation but we also had extra practice, so did not have enough time for thinking and discussing. Extra practice was very exciting!
Aug 17 (Wed)	Anesthesia Presentation day. Couldn't wake up early. I had a severe stomach ache so I couldn't concentrate on the presentation, too bad. Joined extra practice, abdominal wall rupture.
Aug 18 (Thu)	Anesthesia Tried epidural nerve block, but couldn't succeed. Had only few case in the afternoon, because teacher had conference. Joined extra practice, but did nothing.
Aug 19 (Fri)	Anesthesia Did anesthesia of Thai Ridgeback. Almost panic because the dog was very nervous and ready to bite anyone.
Aug 20 (Sat)	
Aug 21 (Sun)

<p>Aug 22 (Mon)</p>	<p>Soft tissue Did assistant for cryptorchidism. Procedure finished very fast. Saw new procedure for reduction of perineal hernia. Too tired to do anything</p>
<p>Aug 23 (Tue)</p>	<p>Soft tissue Splenoectomy in the morning, did not know the name of the vessel. Ms Benjan taught me very well. Mastectomy in the afternoon, prepared for presentation. I was tired, so I couldn't prepare well, regret so much...</p>
<p>Aug 24 (Wed)</p>	<p>Soft tissue Presentation in morning. Very nervous and all the script just slipped away. Afternoon, I had opportunity to do castration! It was very different to actually doing it by yourself than just observing or do assistant. I heard our senior had more opportunity to do surgery and I wish I could do more, too.</p>
<p>Aug 25 (Thu)</p>	<p>Soft tissue Saw marsupialization I was upset for my bad assistant ability</p>
<p>Aug 26 (Fri)</p>	<p>Soft tissue My case didn't come SO SAD to say goodbye to everyone.. students and teachers took grate care of us THANK YOU SOOO MUCH</p>
<p>Aug 27 (Sat)</p>	
<p>Aug 28 (Sun)</p>

<p>Aug 29 (Mon)</p>	<p>Poultry unit Lecture in the morning, visiting duck farm in the afternoon. It was very good to have lecture before visiting because I could understand and ask more question to the farmers. It was better if I could have any handouts for every class, since it was the first time I ever heard about ducks. It was very interesting to learn about ducks. We couldn't completely understand about the evaluation method, it could be better if we had handout too.</p>
<p>Aug 30 (Tue)</p>	<p>Poultry unit Hatchery visiting in the morning. Although checking the unhatched eggs were very interesting, it was best not doing more than 300 eggs. After hatchery we had free time to prepare for our reports.</p>
<p>Aug 31 (Wed)</p>	<p>Poultry unit Necropsy of chicken. It was the first time for me to necropsy a chicken so it was difficult to make an effective cut. We didn't know the detail of presentation until this day.</p>
<p>Sept 1 (Thu)</p>	<p>Aquatic unit Visiting shrimp farm. The weather was very nice in the morning and it was comfortable observing outdoor pools for large shrimp. In the nursery, all the young shrimps were sold out the day before so we couldn't see hoe to manage the small shrimps. We collected the leftover one and took back to the lab.</p>
<p>Sept 2 (Fri)</p>	<p>Aquatic unit Had brief lecture of fish management, especially ornamental fish. Afternoon, practice of fish surgery, It was very interesting incising and suturing animal with scales.</p>
<p>Sept 3 (Sat)</p>	<p>Went to chinese traditional market, nakon pathon</p>

Weekly Report Hokkaido University Name Fumi Sugiyama

Note: This report must submit to the teaching staff at your university via e-mail and CC CVE office. Not necessary to report on holiday and weekends (Sat & Sun) unless the training was being held.

<p>Sept 4 (Sun)</p>	
<p>Sept 5 (Mon)</p>	<p>Aquatic unit Crayfish farm, guppy farm, fighting fish farm, exotic fish exporting shop. It was easy to check the quality of water because we had a chance to practice in the shrimp farm. The exporting company was run by young men and was like a venture company. In my opinion the demand of the ornamental fish will rise in the future. So the quarantine of the fish and management will be the point of economy growth. Also we should prevent the specie from extinction.</p>
<p>Sept 6 (Tue)</p>	<p>Swine unit We had theme to work on.</p>
<p>Sept 7 (Wed)</p>	<p>Swine unit Lecture for one-day long The theme was interesting. I understood I knew nothing about swine disease</p>
<p>Sept 8 (Thu)</p>	<p>Swine unit Necropsy I had opportunity to take close look to abnormal piglet's lungs. I learned a lot about bacterial infected lung and bacterial infected lung. We made a small presentation for PRDC in the afternoon. I could learn more while preparing presentation with everyone than preparing on my own.</p>
<p>Sept 9 (Fri)</p>	<p>Presentation day I couldn't prepare the script for the presentation so I didn't come up with the proper word during presentation which made it difficult to understood.</p>

Sept 10 (Sat)	Went Kanchanaburii waterfall
Sept 11 (Sun)	Kwai rever
Sept 12 (Mon)	Elephant unit Went to the jungle. Riding on the back of the truck was so fun. Saw many elephants in the forest. Could be better if we were more informed about going to the jungle. Had no idea what we were doing and was so tired. We were late for welcome party, and was too exhausted too. I am sorry to Hokkaido students that I was too shy and stink.
Sept 13 (Tue)	Elephant unit Lecture about elephant in the morning. Watched two videos about elephants and one for deer and bankew. We had a long free time so I went to see the elephant. Afternoon, we counted semen of elephant. In the evening we had extra practice in small animal hospital and I went to OPD and saw some cases. Few cases were new and it made me think more of how to test and diagnose.
Sept 14 (Wed)	Elephant surgery. I would like to thank to Dr Ponchai for arranging the schedule and made the opportunity to observe the elephant surgery. It was so different from small animal, especially in the drug management for pre and post-operative. Elephants were sometime very tolerant but sometime very strong. We went to a private zoo in the afternoon and observed how to anesthetize a tiger and a leopard. In wild animal, since you cannot do any exam without anesthetizing, the hard point is not just treatment but also choosing the drug and deciding the dose which requires many knowledge and experience and confident. Dr Ben showed how wildlife vets should behave. Evening, we met 4 th year Thai students. I wish they would come to Japan later.

Sept 15 (Thu)	<p>Monkey unit</p> <p>Visited Lopbri for monkey survey. It was very hard for me to wake up so early in the morning. The van was late. Very difficult to sleep in too. At the mountain, we were explained how they were planning to live together with the monkeys. In the city area, we saw many monkeys and they sometime bite me. We could have more lecture before.</p>
Sept 16 (Fri)	<p>How to diagnosis exotic unit lecture was in the morning. First I didn't understand the point of the lecture but in the end, I kind of had an image of the attitude we should have especially when we have an exotic pet in front of us. I thought this was not only for exotics but for small animal as well.</p> <p>In the afternoon, we went to the raptor unit. For wild raptors, they immigrate to japan so some of the patients were familiar to me. I was interested.</p>
Sept 17 (Sat)	<p>Bangkok</p>
Sept 18 (Sun)	<p>Bangkok</p>
Sept 19 (Mon)	<p>Bovine unit at noghnpoh</p> <p>Was not so far from KPS. After arrival, we had brief explanation about our week and we were separated into three groups. I was in the first group so we could see few cases but the rest of us were waiting half an day for an case. I thought we didn't have to leave the dorm so early.</p>
Sept 20 (Tue)	<p>Farm visiting</p> <p>Teacher let us do many rectal palpation but she was too busy explaining to us. We had many farm visiting case this day. Second day of market meal didn't taste good at all. Since I do not have much knowledge of dairy cow in Thai, it was hard to predict or understand what kind of treatment the doctor was giving to the cow. I was too tired to take a shower and it was painful in the morning with cold water.</p>

Weekly Report Hokkaido University Name Fumi Sugiyama

Note: This report must submit to the teaching staff at your university via e-mail and CC CVE office. Not necessary to report on holiday and weekends (Sat & Sun) unless the training was being held.

Sept 21 (Wed)	<p>Farm visiting</p> <p>We had Dr Wandee with us and she explained a lot. We went near kanchanaburee so we didn't see much cases and mostly on the car but it was not a problem for me. At night time they had a big market but I didn't have enough time to enjoy it.</p>
Sept 22 (Thu)	<p>Farm visiting</p> <p>Teacher explained us about blood parasite. We couldn't do much palpation and we mainly observed. I didn't feel well and couldn't join rest of us preparing for the presentation.</p>
Sept 23 (Fri)	<p>Presentation day</p> <p>Finished preparing in the morning and had presentation in the afternoon. We should have had a lecture, just one time is enough, and I don't think this stay should be this long because most of the time we were just sitting or observing and the teachers looked so busy.</p> <p>I was expecting for an opportunity to watch surgery but none of the cases needed any surgical treatment. It was a painful week for me.</p>
Sept 24 (Sat)	<p>amphawa</p>
Sept 25 (Sun)	<p>nakonpathon</p>
Sept 26 (Mon)	<p>Farm visiting</p> <p>Visit nine farms. Mastitis, hoof trimming, retained placenta was found. We didn't do rectal palpation because there weren't much cases. Most of them were follow-up cases. It was hard for me to keep up because there were so many similar cases.</p>

Weekly Report Hokkaido University Name Fumi Sugiyama

Note: This report must submit to the teaching staff at your university via e-mail and CC CVE office. Not necessary to report on holiday and weekends (Sat & Sun) unless the training was being held.

<p>Sept 27 (Tue)</p>	<p>Visiting Farms We were expecting for new cases but most of them were just follow-up from yesterday. I regret I didn't take more detailed memo for them. Some of them we didn't do general exam yesterday so it was hard to compare. We finished early and did case presentation. I presented about case of BEF which was quite hard to explain.</p>
<p>Sept 28 (Wed)</p>	<p>Stay in Hospital Watched treatment for urachal remnant. After, Nui sensei taught us about hormone balance during pregnancy, and about rumen acidosis. I didn't have complete knowledge about rumen acidosis so it was very interesting, and made me understand more clearly. In the afternoon, I studied by myself about cow reproduction. I went to DrNui again, to ask about ketosis.</p>
<p>Sept 29 (Thu)</p>	<p>Visiting Farm I had to choose from today's case for presentation on Friday, but actually we didn't have new case. Dr Mit had case for surgery so I decided to do presentation for it. The case was quite complicated, because the cause of the obstruction was very rare.</p>
<p>Sept 30 (Fri)</p>	<p>Presentation I should have discussed more with my buddy because there was a little difference in our understanding, which caused confusion when we answered some questions. Overall, since our case was very complicated and the theme was hard to explain in English, I think we did the best for our presentation.</p>
<p>Oct 1 (Sat)</p>	<p>pattaya</p>
<p>Oct 2 (Sun)</p>	<p>pattaya</p>

Weekly Report Hokkaido University Name Fumi Sugiyama

Note: This report must submit to the teaching staff at your university via e-mail and CC CVE office. Not necessary to report on holiday and weekends (Sat & Sun) unless the training was being held.

<p>Oct 3 (Mon)</p>	<p>Data Analysis We didn't have any data, and were told to search for problems which should occur in dairy farms, but we had no idea for it and was very hard to search. I noticed I wasn't very good in data analysis. We had lecture from DrTheera, for infectious disease and was very profitable.</p>
<p>Oct 4 (Tue)</p>	<p>Data analysis We still didn't have data. We went to the demonstration farm which was quite far and hard to go, in the afternoon. I was too tired asking anything to the clinician. It was also exhausting going back from the demonstration farm.</p>
<p>Oct 5 (Wed)</p>	<p>Demonstration farm In the morning, we did data analysis. But I didn't understand well. In the afternoon, we had chance to practice with the beef cows which was so aggressive, I've never seen a cow such aggressive. After, we went to night market, for our last time. It was same as usual.</p>
<p>Oct 6 (Thu)</p>	<p>Demonstration farm We did rectal palpation with doctor Anuchai. I kind of got a clue how to grab the ovary. The cow was very nice and let me palpate as much as I want. However, I couldn't figure out whether if its pregnant or not. In the afternoon, We did presentation for the data. But the electricity was out. Also, the teacher was upset with our results.</p>
<p>Oct 7 (Fri)</p>	<p>Oral Exam It was horrible! I had no idea what to study and I couldn't prepare for anything. I hardly could not answer my teacher's questions and made him so upset. In the afternoon we had review- presentation and had farewell party in the evening. I would like to thank everybody for helping us studying in Thai, and for giving me a special opportunity for everything I did in Thailand.</p>
<p>Oct 8 (Sat)</p>	<p>Leaving for japan</p>
