Aug 7 (Mon)	We did necropsy of four pigs. We divided into two groups and did one in the morning, and another one in the afternoon. It was so difficult but interesting that we did necropsy by ourselves and thought about the problem of the pig.
Aug 8 (Tue)	We had a class about the evaluation of chicken health and quality. Then we went to the broiler farm and check the food, water, housing, environment of broiler according the list.
Aug 9 (Wed)	We did the necropsy of chicken. First, we evaluated the chick quality and tona score. Then we did the necropsy and evaluated healthy level. In the afternoon, we prepare for presentation on Friday.
Aug 10 (Thu)	We did the necropsy of chicken gut. We paid attention to intestine in particular. We evaluated the intestinal health and eimeria infection. In the afternoon, we prepare for presentation on Friday.
Aug 11 (Fri)	In the early morning, we participated a ceremony of rice growing. In the afternoon, we each gave a presentation of what we learned during this two weeks. My presentation was about the swine necropsy. Preparation for presentation was so hard, but it was interesting to hear friend's presentation.
Aug 12 (Sat)	No training.
Aug 13 (Sun)	No training.

Aug 14 (Mon)	No training.
Aug 15 (Tue)	We visited Mt. Erawan. I tried to observe the monkeys for 3 hours, but I could not see any monkeys at my observation point. The monkeys seemed not to come close to humans.
Aug 16 (Wed)	In the morning, we had a lecture about the project to live together with monkeys and protect nature in Mt. Erawan. It was interesting that they use bamboo to make a fence. Then we visited Lopburi. I was surprised that there were so many monkeys in the city. The monkeys seemed to be used to live in the city and be fed by human.
Aug 17 (Thu)	In the morning, we did the practice of elephant anesthesia. In the afternoon, we had a lecture about wildlife veterinarian and looked around the deer farm with high school students. Then we had a lecture about elephant medicine and surgery. I have not studied about elephant treatment before, today's lecture was so interesting.
Aug 18 (Fri)	We visited Kanchanaburi today. It was exiting that we ran the mountain road by truck, and on the way, we could see an elephant. I think it is very difficult problem to protect wildlife.
Aug 19 (Sat)	No training.
Aug 20 (Sun)	No training.

Aug 21 (Mon)	This week, we have a practice in Nongpho. We divided into two groups and our group visited three farms today. It was my first time to see the bovine treatment in Thailand, so I thought there were a lot of things to study about bovine.
Aug 22 (Tue)	Today our group visited six farms in Kanchanaburi. We could do rectal examination many times to detect the cattle was pregnant or not. It was very difficult to touch the organ from rectal, I want to be able to do it well.
Aug 23 (Wed)	Today our group visited two farms. In one case, I saw the pneumonia cattle. I was surprised that the doctor did physical examination and decide the diagnosis and treatment very quickly.
Aug 24 (Thu)	Today I did the rectal examination and took blood sample from caudal vein. I was glad that I thought I was able to do rectal examination and took blood sample better than before.
Aug 25 (Fri)	In the morning, we prepared for the presentation. In the afternoon, we gave a presentation about pneumonia and hypocalcemia. Case discussion was interesting. Through the days in Nongpho, I was very encouraged that in Nongpho there were many women cattle veterinarians.
Aug 26 (Sat)	No training.
Aug 27 (Sun)	No training.
