<p>July 31 (Mon)</p>	<p>I learned about aquaculture of shrimp in Thailand and visited Growout farm of white shrimp (<i>Penaeus vannamei</i>). The lecture was about the way and features of shrimp culture in Thailand. I also learned infectious and environmental diseases of fish.</p>
<p>Aug 1 (Tue)</p>	<p>I learned how veterinarians in Thailand prevent and treat with diseases of fish. And visited a farm of guppy. There I tried to diagnose a case of guppy's rapidly death. The final diagnosis will be shown tomorrow.</p>
<p>Aug 2 (Wed)</p>	<p>In the morning, I discussed the case of guppy farm we visited yesterday with my classmates. I confirmed what kind of parasite caused the disease by microscope. In the afternoon, I joined a class for fifth grade students of Kasetsart university, then performed surgery using general anesthesia on fish.</p>
<p>Aug 3 (Thu)</p>	<p>In the morning, I learned the pig culture in Thailand. That was about the overview of Thai pig and the way to feed and treat them at each stage of growth. In the afternoon, I learned some important pig diseases and how to find and deal with them. I also learned the molecular biological way to find these diseases.</p>
<p>Aug 4 (Fri)</p>	<p>Today I visited one unit of a big pig farm, SPF farm. SPF farm has 27000 sows in total and the unit we visited has approximately 9000 sows. There were 4 units, one was for gilt and the other were for sows. Gestating and lactating were performed in every unit. I saw many piglets before weaning and mother sows lactating their offsprings.</p>
<p>Aug 5 (Sat)</p>	
<p>Aug 6 (Sun)</p>
